

COVID-19: OPPORTUNITY FOR REINVENTION

Creative approaches for a new era of interactives

As museums, science centers, theme parks, corporate offices, and more look toward the future, Blue Telescope is committed to working with our clients and colleagues to determine the safest, healthiest, and most responsible approaches to a post-COVID-19 world.

Together, we can create (and re-create) experiences that are ready in time for returning visitors, allocate costs and resources efficiently, and safely tell the story that your interactive experience is seeking to convey.

EXPLORE TOUCH MODELS

NO LOW FULL

- Gesture control
- Voice control
- Proximity sensors

- Foot control
- Touchscreen surface shields
- Single-use touch tools

- Anti-microbial spray
- Enhanced cleaning practices
- Modified throughput

MAKE GUESTS FEEL SAFE

Lead with science

Follow industry best practices, the recommendations of health officials, and evolve approaches as new information continues to emerge.

Adapt existing technology

Retrofit existing hardware, adapt previous installations, and bring past exhibits into a current world.

Look for guidance

Partner with a team who follows these same principles, and listen to the concerns of clients, audiences, and colleagues.
